

QException

```
classDiagram
    class QException {
    }
    class DAWInputs_DAWError {
        + DAWError()
    }
    DAWInputs_DAWError --|> QException
```

The diagram illustrates a class hierarchy. At the top is the 'QException' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'QException', while the middle and bottom compartments are empty. Below it is the 'DAWInputs::DAWError' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'DAWInputs::DAWError', the middle compartment is empty, and the bottom compartment contains the method signature '+ DAWError()'. A blue arrow with an open triangular head points from the top of the 'DAWInputs::DAWError' class to the bottom of the 'QException' class, indicating that 'DAWInputs::DAWError' inherits from 'QException'.

DAWInputs::DAWError

+ DAWError()
